An experimental study has been applied. After that criticism begins. Quantitative methods from the 1960s, on the hand, qualitative research is actively in the 1970s in Germany. Different research methods controversy began. The study was In the United States and Europe. You have any questions in a variety of academic backgrounds. In this study, I will study the new methodology. In 1980, the narrative begins. And objective hermeneutics appears. In addition, a qualitative interview study generalizations are discussed. How to develop a quantitative research study. In 1990, with transparency in social anthropology never to Outsider “other group” to study. The principal target of the methodology to compare the various models. Based on this background the methodology to study inter-subjectivity are timely.

The need for research

Why is the study of inter-subjective. A variety of methods to solve social problems is to take advantage. It is not easy to understand the modern. Although the development of science and technology was rapidly advancing knowledge, The reason is both a complex social phenomenon is not easy to understand. In addition, the questions are on the rise. Against existing knowledge Is changing rapidly. This change in lifestyle and a new community individualized aspect is taking place. People were required Long–lasting changes in social inequality to be a variety of knowledge. To understand the new social phenomena was developed. And lifestyle changes, plus the fact that the area in accordance with a special environment, time, depending on the situation is understood social phenomenon. As well as, the environment in a variety of special affects. Inter-subjectivity need to study a variety of community is changeable. The reason is because there is a limit. The process of understanding a social phenomenon with only uniform knowledge. Thus far this study inter-subjectivity claimed. Each part of the academic areas that we believe need to be comprehensive. Methodology and would like to take advantage of inter-subjectivity. In addition, research in various aspects of inter-subjectivity the methodological limitations of Complementary perspective to overcome. The aim of the study is to understand the variety of social phenomena. Is to use the methodology is expected to broaden the horizons. the study of inter-subjectivity has a methodological significance.
