(Received June 6, 2013; Accepted August 2, 2013)

Caluya is the only Island Municipality among the 18 towns of the Province of Antique in the Philippines. Although the place is considered remote, the Local Government Unit (LGU) is hopeful for its total development through education. To achieve this end, the LGU and the University of Antique-Caluya Extension Campus became partners and initiated a program in their desire to uplift the mathematics classroom performance of the learners in the locality. This paper will expose how the partnership works particularly the processes, implementation, and on how a Teacher’s Training was held and Lesson Study was introduced.

Keywords: lesson study in the Philippines, anthropological theory of didactics, teacher professional development
