An Review on Base Model of Job Search of the Elderly

Choon-seok Rim

Abstract

In this study, job search is on of the financial difficulties in old age. We show four dimensions of agonies in later life such as reduced income, weakened health, lonesomeness, and, and boredom. Of these four needs, income may be the center source aggravating rest agonies. In Korea, there are variety of work types for the elderly. First, Korean elderly can work as a force of the public Interests. The public interest works are transportation control, subway guidance, and environmental monitors. There is also a work of education type such as teaching young generation Korean culture and social orders. Third, there are work opportunities of welfare duties such as working in retirement home and other facilities. Many financial consultant businesses can help you while planning financial affairs, particularly when you have to understand the differences between income and expenditure as well as the risks that entail an investment. These companies are prepared to fulfill all your requirements using basic financial concepts such as personal finance, finance of states, business finance, financial economics and financial mathematics. They are organized in many fields in order to attract as many potential clients as they can, we reviewed meaningfulness of residential mobility in old age.

1. Introduction

1. Concept of Job

When we consider elderly problems, we need to first think about financial issues. When people have to make investment decisions, it is very important to be well advised. Therefore, many financial consultant businesses can help you while planning financial affairs, particularly when you have to understand the differences between income and expenditure as well as the risks that entail an investment. These companies are prepared to fulfill all your requirements using basic financial concepts such as personal finance, finance of states, business finance, financial economics and financial mathematics. They are organized in many fields in order to attract as many potential clients as they can. We introduce four dimensions of agonies in later life such as reduced income, weakened health, lonesomeness, and, and boredom. Of these four needs, income may be the center source aggravating rest agonies. The single most important demographic change about the elderly is that more people are living to face the challenges of old age. In 1960 the percentage of the total population aged 60 years and over was 5.0 percent, and 65 years and over 2.9 percent. In 1995 the figures were 9.0 percent, and 5.7 percent, respectively. In 2000 it is projected to reach 10.7 percent and 6.8 percent respectively. This is only the beginning: because of the baby boom generation, by 2020 almost 20 percent of the population will be over age sixty. Because traditional role1) of children for caring the aged parents is dwindling while demands are enlarging, self-role of the elderly for caring themselves are becoming more delicate and extensive. Efficient way of spending time and earning money is a good solution of resolving a major social security
